She doesn't like technology and isn't really up for using the iPad as her recipe guide, so buying used cookbooks is the way to go for us. She has made at least 20-25 items in the last few months out of this book and everything tastes great. The book itself she likes a lot and likes the attached pictures with a lot of the recipes so she has a idea of what everything should look like.1 of 1 people found the following review helpful.
