Perfect for the all-grain brewer!By loan rangerI've been brewing all-grain for several years and this is simply the best book that I've ever come across. It introduces new concepts and techniques in a perfect way. It perfectly dives into each subject with the proper amount of detail. It is not an exhaustive project on any particular subject and never runs the risk of boring the reader. It has been the most helpful resource that I've ever come across.0 of 0 people found the following review helpful. easy to read and digestBy customer aaeasy to read and digest.almost everything one needs is in the book in a very concise style (another reviewer has said 95%, I agree, and probably you would barely need the remaining 5%)I am enjoying reading it on my spare time, but it is extremely handy for a quick reference on a busy brewing day as well, which is really crucial.I own the classics and I feel deeply indebted to the giants of Papazian and Palmer. This book builds on these classics and takes the delivery of

essential knowledge to the next level. My humble opinion, buy all three, pay tribute to and enjoy reading Papazian and Palmer on your spare time or to get recipe ideas, use Karnowski as your main reference especially on a brew day. 0 of 0 people found the following review helpful. Great Book for Newly Serious Brewers By J. Walker I liked this book and would recommend it. I'm a pretty serious homebrewer - for example, I do yeast farming and other similar things that many homebrewers don't bother with. I've read a large number of brewing books. I liked this book because it is well organized, logically presented and well written. I learned 6 or 8 new things from it, which is great, and it reinforced many things that are worthy of reminders from time to time. This book is very well suited to the people who have just made the leap from extract to all grain brewing and want to learn more about what they are doing. I think it is great for that audience and for even more advanced brewers. Although I'm sure all this information is available somewhere on the interwebs, it is hard to find and not nearly as logically organized as it is in this book.

About the Author Mike Karnowski is the Head Brewer of specialty beers at Green Man Brewery in Asheville, NC. He has brewed at home and professionally for about 25 years, and previously owned a homebrew supply store in New Orleans. Mike is a Beer Judge Certification Program certified beer judge and has judged homebrew competitions for more than two decades.
