**Bill Owens : How to Build a Small Brewery** before purchasing it in order to gauge whether or not it would be worth my time, and all praised How to Build a Small Brewery:

20 of 21 people found the following review helpful. Thinnest Book I Have Ever Seen By James Card I have collection of beer brewing books and this is definitely not going to add anything that is not covered in much more depth in the other books. At only 47 pages with half of that being illustrations, I read it cover to cover in half an hour. For someone that has no idea about brewing it can give you the basic jist of the process and equipment in simple straightforward way. To me this is something that you would get for free with your first kit from your homebrew shop - not pay for.0

of 0 people found the following review helpful. Start making beer it is easy with this book. By Jack007flash Easy to understand directions have me making beer all the time now. 2 of 3 people found the following review helpful. Why did I buy this book? By Poor old dad Not only did I purchase this book, but I paid extra for quick delivery! If anyone out there is considering buying this book, be advised that it is all sizzle and no steak! How could the book be better? Maybe the author could send it out for free, prepaid? Nah, that's not nice! The author/publisher do deserve to earn something for this very thin volume, so maybe they could just put it on the web and charge a buck for a download.

The brewing techniques described in this book are the same as Bill Owens used at his brewery, Buffalo Bill's Brewery located in Hayward, California. Bill's six barrel brewhouse uses the same tower (gravity) brewing method as described in this book. A ten gallon brewing system can be built in a couple of weekends. Bill Owens shows you: how to build a mash tun from a camping cooler; how to convert a beer keg into a kettle; how to construct a heat exchanger from a garden hose; how to control fermentation. This book explains how, on your first brew, you can produce wonderful, cold, clear and carbonated beers in just 10 days.
