fried chicken at an Indian restaurant and couldn't duplicate it no matter how hard I tried. But this book showed me how to make it step by step and it's even more delicious than the chain restaurant's. There are so many options to choose from in this book, snacks, appetizers, main courses, meat filled, vegetarian. The list goes on and on. The chicken puffs are my favorite so far, so easy to make but so light and fluffy and airy. They're great inside almost any soup I've dropped them into. This book is wonderful and trying all of these recipes is going to be so fun!

The stuffed tomatoes in this book are to die for, with the addition of marsala, it's so filling with just the perfect amount of savory flavor. I'd never had stuffed tomatoes but after trying a DIFFERENT recipe, this one is definitely the best hands down. The deep fried cauliflower is something I would've never thought tasted good, but all of the flavors in the recipe really make it delicious. These recipes are so easy to follow and while there are a lot of ingredients, each one is essential and the end product is so worth it. This is a purchase I definitely don't regret!

I feel like I am reading a book from someone who has English as a second language. Some of the recipes are not even comprehensible. I hate how greedy some people are. I think if you're doing something you should really do it well. I would be embarrassed to put my name on this product.
