Thanks.0 of 6 people found the following review helpful. great gripping and knowledgeable book that will help anyoneBy A CustomerI think that the art of making wine has not only a superficial touch but also has to have the touch that has existed for centuries.The wines that have been made this way have to sell as they have the fragrance and the bouquet of old wines that have been made and nurtured through centuries. The making of these wines have not only the touch of the country but also that of the winemaker that gives it that extra flavour.

Italy has been producing wine for over 2,500 years and today is one of the world's major producers. This book aims to describe the best wines and their makers, and also places Italian wine in an international context, with reference to the ancient and modern history of wine production, current legislation, technology and production trends. This new edition is revised and updated. The author has written many articles on Italian wines and gastronomy.
