Julie Le Clerc : Little Cafe Cakes before purchasing it in order to gage whether or not it would be worth my time, and all praised Little Cafe Cakes:

Little cakes are a new trend in cafes and restaurants. Rather than the big muffin or slice of cake, the little cake is growing in popularity. They are quick and easy to prepare, are much more attractive than muffins and can be further enhanced by decorating with simple icings and syrups. Enticing and charming, the versatility of the little cake means it can double as the perfect dessert. It's not surprising that smart little cakes are featuring on cafe menus all around the world.
