Len Hopkins : Making Wine with Fruits, Roots Flowers: Recipes for Distinctive Delicious Wild Wines before purchasing it in order to gauge whether or not it would be worth my time, and all praised Making Wine with Fruits, Roots Flowers: Recipes for Distinctive Delicious Wild Wines:

5 of 5 people found the following review helpful. Incredibly descriptive, elucidating book By marioc63I have made several batches of fruit and dandelion wines over the years and just wanted to punch my understanding and excitement to the next level. This book does it. Strong references, good details, great [but few] illustrations, etc. The author treats

some hard-to-grasp concepts with extra care, leaving the guesswork behind. Heck, working with yeast is already a challenge enough. Not a picture book, so for those visual learners, you might start elsewhere. But, a handsome book that would be welcomed in anybody's library! 0 of 0 people found the following review helpful. Lots of good information
By Amanda Of Alaska I love this book! I make wine at home for myself and this had opened up so many more possibilities for me! So many more recipes and ideas that I didn't have! It is a must have for anyone a expert of just starting out in the world of wine making. 0 of 0 people found the following review helpful. Five Stars
By Chevy Man A good book on the basics of making wine from fruits, roots, and flowers.

Foraging is an innate part of human endeavor, and in earlier centuries one essential for survival. Apart from providing food, wild plants yield the fundamental ingredients to produce wine, which, to many people, has a civilizing quality. Detailed in this practical book are wines you can inexpensively make at home. These include: Wines created from flowers Wines produced from fruits Vegetable and root wines Grain, leaf and stem wines Country wines reach back into our ancestry and this book brings them alive in a practical way, enabling everyone to create wines that will enrich family life. "Wines don't have to be made from just grapes. From root to fruit, let this book be your guide to a whole world of country wines to discover. Learn how easy and satisfying it is to capture nature's bounty in a bottle while harvesting your own ingredients from your backyard and beyond for your own homemade country wines" —Brad Ring, Publisher, WineMaker magazine, www.winemakermag.com.

About the Author Len Hopkins enjoys the challenge and fun of living a "self-sufficient" lifestyle. This book is the culmination of thirty years' practice in foraging and fermenting.
