Somewhere along the way to mass produced, pre-packaged foods ndash; in particular cookies and cakes ndash; a misconception was born. That is: baking from scratch is hard. Baking from scratch is no more difficult than grabbing a preservative and artificial flavor laden mix from your local grocery store. It's a simple formula: add wet ingredients to dry ingredients, mix, and bake. Anyone can do it and when baking from scratch you can pick your ingredients and cut back on all those preservatives the food companies are so fond of. The recipes in this book are easy enough for a novice baker to follow and easy for the kids in your life to follow. Grab some ingredients from the store, find the necessary tools that you probably already have in your kitchen, and get to baking memories.

About the Author Always dodging the camera, Mary Matthews is an Orange County, California native transplanted into the snowy MidWest. She is an IT professional who uses baking and writing as stress relief from the demands of on-call, cranky users, office politics, constant learning curves, and ever leaner departmental budgets. She is overly fond of her 25-year old pickup truck, affectionately known as "Bubbard", her growing menagerie of 2 cats, 3 Great Pyrenees, and her very patient, saint-of-a-husband lovingly nicknamed The Big Guy.
