Karl F. Lutzen, Mark Stevens : More Homebrew Favorites: More Than 260 New Brews! before purchasing it in order to gage whether or not it would be worth my time, and all praised More Homebrew Favorites: More Than 260 New Brews!:

0 of 0 people found the following review helpful. Interesting book with lots of recipesBy CPThis seems like a pretty

good book. I have been looking at it for about a week and it has a variety of recipes in there. Unfortunately many of the recipes have no comments at all and many that do have comments simply state what ribbon the beer won in which state fair. Very few of them actually state what the recipe resembles or how it tastes. Overall it seems to be a good collection of recipes, just a little disappointed that there isn't more tasting comments. 0 of 0 people found the following review helpful. An even better selection than "Homebrew Favorites" By A. Burchfield This book has a format very similar to that of Homebrew Favorites but has about 20 more recipes, many of them still carrying outrageous names. I liked the later chapters on fruit beers and the herb spice beers, the idea of using hot peppers (they advise caution) as a flavoring has appeal to me, might help with the flavor some. Chapter 15, the last one, has mead recipes again, I appreciate that one, it'd be the one I'd most want to try. 15 of 15 people found the following review helpful. Good collection of recipes By A Customer Before I bought this book I looked at a couple of others first. I thought about Papazian's "Homebrewers Companion" but it had a lot of things other than recipes that I didn't need, and I thought about Higgins "Homebrewers Recipe Guide", but I didn't believe that even 3 people ever really brewed and tested 200 recipes, so I was left with Lutzen and Stevens two books "Homebrew Favorites" and "More Homebrew Favorites". I bought them both. The books contain lots of recipes (240 in the first volume, 260 in the second) and in every single style. The recipes are evenly split between easy extract recipes and the more advanced all grain recipes. (Good! I can be challenged when my skills improve.) Most important to me was that the beers were brewed by a lot of different people, and a lot of them won awards in lots of different contests and lots of them include some comments about how the beers turned out. This gives me confidence that the recipes really worked and the huge number of recipes gives me lots of options and even helps me create my own variations, picking elements I like from one recipe and combining them from another. The two "Homebrew Favorites" books are probably the best recipe collections on the market, at least for my needs (and probably most other homebrewers too). The books really are on target as far as knowing what homebrewers do in their kitchens. The only reason I didn't give it 5 stars is that there are some recipes in the book that too simple for me or that are kind of goofy (I don't want to make beer with hot peppers in it!) Maybe you would like this though, so look at it and see.

Karl F. Lutzen and Mark Stevens offer 260 original recipes for innovative and tasty homebrews. With straightforward directions for making both extract and all-grain beers, you'll be inspired to try your hand at new and exciting varieties. Cool off on a hot day with a refreshing Kiwi Mint Ale, or brighten a rainy day with a fortifying Northwest Stout. Whether you prefer American lagers, Belgian ales, or something more exotic, you'll find everything you need to know to brew your favorite beers at home.

From the Back Cover Lutzen Stevens are back with more than 260 of the latest great homebrew innovations. All brewers, even those who formulate their own recipes, will want to own this wide-ranging recipe book, which includes:

- * Recipes for both extract and all-grain beers, offering combinations for novices and experienced homebrewers
- * Clear, straightforward directions for making ales, lagers, meads, and specialty beers
- * Unusual recipes for exotic brews
- * Directions for brewing lesser-known beers
- * Comments and brewing tips from contributing brewers
